

DHANUSH KODI PALANISAMY

Senior Full-Stack Developer | Java | Spring Boot | React | Cloud Integrations

Chennai, Tamil Nadu 600130 • +91 9566365706 • kodidhanush1402@gmail.com • linkedin.com/in/dhanush-kodi1402

PROFESSIONAL SUMMARY

Senior Full-Stack Developer with 4+ years of experience designing and delivering scalable enterprise applications in the Banking and FinTech domain. Proficient in Java, Spring Boot, React, and cloud-native integration technologies including AWS S3, Azure Event Hub, Apache Kafka, and ActiveMQ. Experienced in building end-to-end transport-layer integrations, mentoring development teams, and driving UI architecture using Nx Monorepo. Strong background in Agile methodologies, reusable component design, and workflow-driven banking platforms.

TECHNICAL SKILLS

Backend: Java, Core Java, Spring Boot, Node.js, REST API Development, Microservices

Frontend: React, Bootstrap, HTML5, CSS3, JavaScript (ES6+), TypeScript

Messaging & Streaming: Apache Kafka, ActiveMQ, RabbitMQ, Azure Event Hub, Azure Service Bus, IBM MQ

Cloud & File Transfer: AWS S3, Azure Cloud, SFTP, FTP, SMTP

Architecture & Tools: Nx Monorepo Architecture, Git (GitHub & GitLab), Agile/Scrum

Domain Knowledge: Banking Platforms, FinTech, Enterprise Integrations, Role-Based Access Control (RBAC)

PROFESSIONAL EXPERIENCE

Consultant – Product Engineer

Intellect Design Arena | Chennai, India | Jun 2025 – Present

- Architected and owned end-to-end backend integration endpoints using Java and Spring Boot across AWS S3, Azure Event Hub, Apache Kafka, SFTP, IBM MQ, and ActiveMQ — processing high-throughput financial data pipelines with zero downtime across 3+ production environments.
- Led the development of a reusable React component library with built-in event-handling abstractions, reducing boilerplate code by ~40% and cutting UI feature delivery time across cross-functional teams.
- Drove full-stack feature delivery on the iTurmeric enterprise banking platform, owning REST API design and transport-layer integration from requirement to production release.
- Mentored 3 junior developers on Spring Boot microservices architecture and React component design best practices, improving code review pass rates and reducing rework cycles.
- Collaborated with cross-functional Agile teams to deliver features meeting enterprise banking quality standards, consistently meeting sprint commitments across quarterly release cycles.

Associate Consultant – Product Engineer

Intellect Design Arena | Chennai, India | Jun 2024 – Jun 2025

- Implemented transport-layer connectivity using Spring Boot integrating AWS S3, Azure Service Bus, Apache Kafka, SFTP, FTP, IBM MQ, and ActiveMQ — enabling reliable enterprise banking workflows across distributed systems.
- Delivered scalable backend REST APIs and frontend React components, contributing to a 25% reduction in API response latency through optimized data handling and connection pooling.
- Enhanced the banking UI using React and Bootstrap, building event-driven components that streamlined 5+ critical user workflows and improved task completion rates for banking operations teams.
- Maintained code quality through structured peer reviews, unit testing, and documentation — achieving consistent adherence to enterprise development standards across all delivered modules.

Associate Software Developer

Techriffs Info Systems | Chennai, India | Nov 2022 – Jun 2024

- Built a comprehensive full-stack banking solution covering 8 modules: Account Creation, Customer Information Management, Transaction Processing, Loan Management, Accounting & Finance, Risk Management, Online Banking, and CRM — delivered on schedule across all milestones.
- Developed backend REST APIs using Java and Spring Boot, implementing business logic for loan processing, transaction management, and financial accounting modules used by 200+ concurrent users.

- Designed and implemented a role-based access control (RBAC) system supporting Customer, Admin, and Manager profiles with dynamic, configurable permission management — reducing unauthorized access incidents to zero post-launch.
- Built responsive frontend interfaces using React and Bootstrap, achieving consistent cross-browser compatibility and reducing UI-related support tickets by 30% post-deployment.
- Translated business requirements into technical solutions end-to-end, collaborating with stakeholders to deliver all modules within agreed timelines and scope.

EDUCATION

Bachelor of Engineering – Mechanical Engineering

Velalar College of Engineering (Anna University) | Erode, India | May 2022

LANGUAGES

English – Professional Proficiency **Tamil** – Native
